DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 12-22 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The newly added material in claims 12 and 19 are "A circuit for automatically assigning the charge pumping system to function in the forward operation mode or the reverse operation mode based at least in part on the input voltage.

Double Patenting

2. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

3. Claims 12-22, 24-28 and 30-37 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-11 of prior U.S. Patent No. 6,657,875. This is a double patenting rejection.

Claims 12, 19, 24 and 30 the input voltage ratio are $n:m$ and $p:q$ where n , m , p , and q are integer values, when the values are 1, 2 or 3 they become a duplicate claim of the patent claims.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 23, 29 and 38-42 are rejected under 35 U.S.C. 102(b) as being anticipated by Nork (5,973,944).

Nork discloses an inductorless step-up and step-down converter with inrush current limiting in Fig. 2. Step-up and step-down regulated converter 200, capacitor 202, input voltage V_{in} , switches 204, 206, 208 and 210, controller 22, In step-up conversion control 220 sends control signals to alternatively turn ON and turn OFF switches 206 and 210 and switches 204 and 208 and in the step-down conversion control 220 sends signal to keep turn OFF switches 206 and 210 and turn ON switches 204 and 208. See col. 6, lines 8-65.

Response to Arguments

Applicant's arguments filed 7/15/04 have been fully considered but they are not persuasive. The added material, which is not supported by the original disclosure, is

not considered in claims 12-22. With respect to claims 23, 29 and 38-42, Applicant's argues that Nork does not use its input node as output node or vice verse. Applicant's does not have such limitation in the claims. Nork teaches the claimed invention in Fig. 2 which shows a step-up and step-down regulated converter 200-capacitor 202, input voltage V_{in} , switches 204, 206, 208 and 210, controller 22. In step-up conversion control 220 sends control signals to alternatively turn ON and turn OFF switches 206 and 210 and switches 204 and 208 and in the step-down conversion control 220 sends signal to keep turn OFF switches 206 and 210 and turn ON switches 204 and 208. See col. 6, lines 8-65.

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
